

Georges Carpentier, Europe's heavyweight pugilistic champion, and his pretty bride were greeted by an enthusiastic throng of admirers when they arrived on La Savois last Tuesday. According to the reporters who interviewed the French war hero and boxing idol and his bride of a few weeks on their way to the Biltmore, Georges showed infinitely better taste in the selection of his life partner than in his choice of neckwear.

Private Oliver C. Dyer was gassed in France. Recently he died in poverty at the City Hospital from a resulting infection of the lungs. The dead war hero would have been buried in Potter's Field had not the K. of C. heard of the case and made possible an impressive burial with full military honors in Calvary Cemetery. A detachment of troops from Governor's Island fired a last volley over the grave.

Mr. W. L. R. Emmet, the famous consulting engineer of the General Electric Company, who supervised the design of the marvelous electrical machinery of the navy's new super-dreadnought Maryland. It was his pioneer work that made possible the successful adoption of the electric drive principle for ships. Mr. Emmet was recently awarded the Edison Medal for achievement in electrical development.

Three snapshot studies of President Wilson taken last Sunday morning as he was leaving the White House for an auto ride through the capital's parks. For many weeks the President has been taking his airings on one of the sheltered verandas of the Executive Mansion and it is only recently that he has been able to go motoring in his Pierce-Arrow touring car. The effects of Mr. Wilson's long illness show plainly in these photographs.

Owing to the scarcity of materials of all kinds in Germany an ingenious Berlin inventor has put out this three-wheeled taxi, which he claims can be more easily handled than the usual type. It has a speed of forty-five miles an hour, and makes thirty miles to a gallon. The two-cylindered motor is located over the front wheel and turns with it.

Double winners over the same twenty-mile course at Miami, Fla. The Gar Jr., an express cruiser owned by Gar Wood, of New York, sets a world's record for boats of its class, while the seaplane Aero Limited No. 4 wins its race from E. B. Thomas's triplane. Both plane and motor boat are equipped with 400 horsepower Liberty motors. Note movie camera man in bow of seaplane.

Wonder what a twenty-four-months-old little girl thinks about? Ruth Clare Briggs, the inspiration of a certain series of famous cartoons in The Tribune, just wants everybody to know that to-day's her second "birthday" and she's "peased" it falls on Sunday, 'cause her daddy's at home.

Tens of thousands of metal German helmets taken during the last months of the war have been stored with great quantities of other war material at Croydon, England. These helmets have been ground into the earth by the trucks and guns that have been moved about the storage yard until they have literally formed a metal roadbed.
